Please Say “NO” to Tax on Golf!!

The undersigned represent golfers and residents of North Carolina that are opposed to any tax on golf in our great state. Although we realize that the current budget crisis is severe, we believe this is a bad idea for the following reasons:

1. It will result in less play, which will translate into loss of jobs within the golf industry, which includes many individuals in golf and golf-supportive industries;
2. Charitable golf outings will suffer greatly due to increased costs
3. The financial impact of the tax on an industry that supports almost 70,000 jobs in our state is not fair and justifiable when we are offering tax incentives to industries in an attempt to get them to MOVE into the state;
4. Other industries will be affected as well, including the already struggling tourism and real estate industry.
